Introduction

At PFS Group, we specialize in delivering foundation solutions for complex construction projects.

With a strong commitment to quality, innovation, and precision, we provide expertise in deep foundation engineering, soil improvement, and geotechnical solutions.

About us

→ Mission

Through advanced engineering, high-performance equipment, and a commitment to quality, our mission is to support projects that stand the test of time while ensuring safety, efficiency, and environmental responsibility.

→ Vision

Our vision is to be a leading global partner in geotechnical and foundation engineering, setting new standards in construction innovation and sustainability.

Our Expertise

→ Progress Bored Piles

→ Shotcrete

→ Testing and quality assurance

→ Ground anchors and nails

→ Grouting and Jet-grouting

Bored Piles

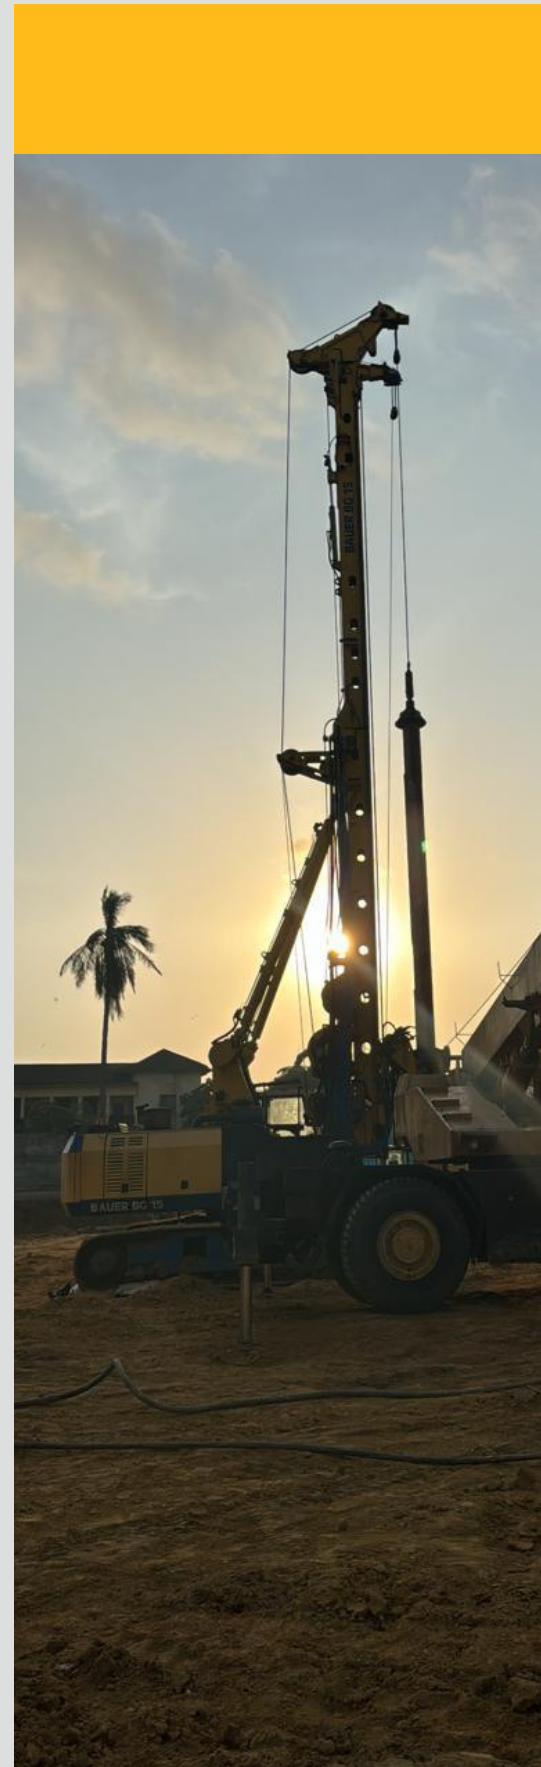

We are specialized in providing strong and stable foundations through our high quality bored piles.

With a focus on safety and quality, and based on a highly skilled design department and site staff, we meticulously analyze site conditions to provide the most suitable solutions and methods of execution.

In the mean of expansion of many companies at the Port of Douala, in Cameroon, Progress has ensured the execution of more than 600 bored piles, with diameters varying between 880 mm and 1 500 mm.

Drilling of the piles was ensured throughout different soil conditions and many existing and unforeseen obstructions.

Using our fleet, we construct micropiles with diameters ranging between 114 mm and 300 mm in cased or uncased drilling methods, depending on the subsoil conditions aswell as the project needs.

Shotcrete

Our shotcrete services involve the application of a high-strength concrete mixture using a compressed air nozzle, resulting in a durable and versatile structural material.

Shotcrete is ideal for stabilizing slopes, repairing and strengthening structures, and more.

Grouting Jet-grouting

Trust PFS for grouting and jet-grouting services that provide reliable solutions for ground consolidation in construction projects.

Our grouting services fill voids and stabilize soil, while jet-grouting creates solid columns in challenging ground conditions.

Ground anchors & nails

Our carefully designed ground anchors and nails offer exceptional stability and structural support, even in challenging soil conditions.

With advanced techniques and industry expertise, we analyze project requirements to determine the most suitable ground anchor design and installation method.

Our skilled team ensures precise and efficient installation, minimizing disruptions and maximizing the effectiveness of the anchor system.

Whether you need ground anchors for slope stabilization, retaining walls, foundation support, or other applications, PFS delivers tailored solutions that meet your specific needs.

Testing & quality assurance

At PFS, we place a strong emphasis on testing and quality assurance to deliver superior quality.

We understand the critical importance of ensuring that our projects meet the highest standards of performance, reliability, and safety.

Our dedicated team of engineers and technicians conducts meticulous testing procedures to verify the functionality, durability, and efficiency of our engineering designs.

Our Equipment

At PFS Group, we rely on a fleet of high-performance equipment designed to tackle the most demanding foundation projects with precision and efficiency.

Description	Quantity	Power Rating	Capacity
BAUER BG28V	5	570 hp	28 ton
BAUER BG15V	2	447 hp	15 ton
BAUER UBW08	4	400 hp	1.2 ton
POWER PACK HD500	1	500 hp	76 ton
OSCILLATOR BV1180	1	402 hp	76 ton
MOBILE RT CRANE	4	-	35 ton
EXTRACTOR 880	1	-	18 ton
MICROPILES RIG ATLAS COPCO	1	110 hp	-
SLURRY DESANDER 140 SOILMEC	1	-	-
GROUT PLANT	3	-	-
VARIOUS PUMPS	15	-	-
CRAWLER CRANE	4		70 ton

Our Staff

At PFS, our strength lies in our people.

Our engineers, technicians, and specialists come from India, Lebanon, Senegal, Vietnam, Chad, Syria, Germany, Cameroon, and beyond, forming a multicultural workforce that thrives on innovation and collaboration.

This diversity enables us to approach geotechnical challenges from multiple perspectives

Client Testimonial

I've worked with many foundation companies, but none compare to PFS. Their attention to detail, safety-first approach, and commitment to deadlines make them the best on the field.

Ahmed R
Infrastructure Consultant

List of Projects

Cameroon

Project	Location
Novia Piling Project	Bonaberi, Douala, Cameroon
Novia - Jet Grout	Bonaberi, Douala, Cameroon
Novia - Micropiles	Bonaberi, Douala, Cameroon
Mimosa - Foundation Piles	Bonaberi, Douala, Cameroon
AFISA Portside Project	Douala Port, Douala, Cameroon
AFISA Skin Grouted Micropiles Test	Douala Port, Douala, Cameroon
Afisa Skin Grouted Micropiles	Douala Port, Douala, Cameroon
Origami Shoring Project	Bonapriso, Douala, Cameroon
DJEUGA Palace Skin Grouted Micropiles Test	Bali, Douala, Cameroon
Dika Project	Bonanjo, Douala, Cameroon
Mixed Use Project	Bonanjo, Douala, Cameroon
MIMOSA II	Bonanjo, Douala, Cameroon
Mixed Use Project Pile Load Test	Bonanjo, Douala, Cameroon

List of Projects

Gabon

Project	Location
TAHITI Foundation Piles	Bord de mère, Libreville, Gabon
Sapeur Pompier Project Foundation Piles	Bessieux, Libreville, Gabon
Commercial Center Project Foundation Piles	Bessieux, Libreville, Gabon
Oloumi Project Foundation Piles	Oloumi, Libreville, Gabon
BODEGA Project Foundation Piles	Bodega, Libreville, Gabon
Twisted Tower Project Foundation Piles	Port Mall - Baie Des Rois
Mall Project Foundation Piles	Libreville, Gabon
Etas Major Project Foundation Piles	Bodega, Libreville, Gabon

Worldwide Group

→ **Cameroon**

→ **Gabon**

→ **Lebanon**

→ **Saudi Arabia**

Our Partners

As a part of our group, AM Partners is specialized in a wide range of construction tasks.

Their comprehensive services include :

- Construction of commercial buildings
- Residential buildings and villas
- Rehabilitation and rebuild
- Bridges
- Retaining walls
- Landscape and hardscape construction
